

Welcome to the Geography Department at Haggerston School.

I have set you the hardest challenge that you will ever face and one that you will have to work on, with your families, for the rest of your life. To begin the challenge, please watch the 8 minute video presented by Sir David Attenborough to explain what is concerning him about our wonderful planet.

Video link:

<https://www.ourplanet.com/en/video/how-to-save-our-planet/>

How will you help to save our planet?

From the video, you heard that there are 4 rules that would bring back the balance with nature. These would ensure that humans do not destroy or damage our planet in the future. These 4 rules are:

1.	Reduce and replace all fossil fuels with renewable energy like wind turbines and solar panels.
2.	Grow food more carefully and reduce the amount of meat that humans eat
3.	Manage and look after the oceans so that they are not polluted and are healthy again
4.	Encourage nature like plants and animals in all places

Tasks -

- 1) Choose **one** of the rules above to help save our planet.
- 2) Think of a way that you and your family could help save our planet
- 3) Complete the evidence sheet to show and explain your idea. You could produce a PowerPoint or take a photograph showing what you have been doing
- 4) Send your evidence sheet or your work to transition@haggerston.hackney.sch.uk

Here are some suggestions, if you are stuck

- i) Reuse a plastic container to grow some vegetables for you and your family to eat
- ii) Reuse a plastic pot to grow some flowers to attract bees or other insects
- iii) Produce a campaign poster to raise other people's awareness of a problem and what they can do to help
- iv) Write a letter to your MP like Meg Hillier to show your concerns and how people in Hackney could try to follow some of the 4 rules.

Geography Challenge - Save our Planet Evidence sheet

Name:

Primary School:

In the space below, explain what your idea is. If you have got any evidence to show how you and your family are completing this challenge, that would be excellent to see.

1. Tick the box to show what rule you are focusing on

	1.	Reduce and replace all fossil fuels with renewable energy like wind turbines and solar panels.
	2.	Grow food more carefully and reduce the amount of meat that humans eat
	3.	Manage and look after the oceans so that they are not polluted and are healthy again
	4.	Encourage nature like plants and animals in all places

2. Explain in the space below what your idea is about. You could add a drawing, photograph or a letter to an MP to show your idea.
