

Climate change poster challenge

Choose a challenge:

- Design an eye-catching poster with information about the crisis of climate change happening right now and include 5 ways that humans can slow it down
- Write a letter to your MP explaining the crisis of climate change, why it's so important to take action and some ways they can make that happen

GLOBAL WARMING

Please include..

- What is 'climate change' ?
- Describe the scale of climate change (add some facts about climate change to your poster eg. How much the temperature is changing by each year)
- Describe and explain the 'Natural' and 'Human' causes
- Research ways in which **we** can make changes in our lives to reduce the affects of climate change.
- Research ways in which **the government** could help make big global changes and reduce the affects of climate change.

Pen to paper: Write a letter on climate change to your local MP.

An MP has tens of thousands of constituents, and many political issues competing for their attention. How can we make them pause to look at the bigger picture and recognise that climate change should be high on their priorities?

Write a letter to our local MP about your concern over climate change. You need to include:

- The evidence for climate change
- The causes of climate change
- The impacts of climate change
- Your personal concerns

Our local MP is Meg Hillier

Dear _____MP

I am writing to you because of my concern that the UK is going in the wrong direction on climate change.

Say what has moved you to write - this might be a general concern for your children or grandchildren's future, recent news about the impacts of climate change (from the Arctic to the Great Barrier Reef, to new global temperature records there are unfortunately no shortage of these), or one particular policy issue you are concerned about.

Explain why you think the UK's current action on climate change is insufficient (the Committee on Climate Change [report](#) may be useful as well as our own briefing [here](#), and another summary [here](#)).

And include something positive, for example the falling cost of renewable energy, the potential for climate jobs to regenerate your local area!

As my MP, I am asking you to call for stronger action on climate change. Please:

(call for action) forward my letter to Greg Clark, the Secretary of State for Business, Energy and Industrial Strategy / raise these issues in Parliament / meet me and others to discuss our concerns / (for a Labour MP) challenge the government more strongly and support positive solutions such as the Campaign against Climate Change's [One Million Climate Jobs](#) campaign.

Best wishes
